NMSC

This five-day course is a recommended prerequisite for the Security+ course. Students are provided hands-on training with the tools, skills, technologies, and methodologies covered in the CompTIA Security+ exam. By completing this course, students will significantly enhance their chances of successfully obtaining their Security+ certification on the first attempt.

NMSC Class Dates

Class	Start/End Date	Year
001	19 Dec / 23 Dec	2022
002	06 Mar / 10 Mar	2023

CNDC / C|EH

This technically challenging two-week hands-on course teaches techniques and methodologies to test and defend your systems, networks, and applications against some of the latest cyber threats. Students will be taught advanced countermeasures for providing computer and network defense through real-life situational training exercises. EC-Council's C|EH certification is approved for four of the five DoD 8570-1.M CND categories.

CISSP

This intense, two-week course provides students a condensed seminar covering the knowledge and expertise required to confidently sit for the CISSP examination. As the first credential accredited by ANSI to ISO Standard 17024:2003 in the field of information security, the Certified Information Systems Security Professional (CISSP) certification proves to be a very challenging exam. As such, students should expect to spend significant hours outside of the core classroom hours for self-directed reading and review. Obtaining the (ISC)2 CISSP certification satisfies the DoD 8570.1-M Information Assurance Technical Level-3 and Information Assurance Management Level-3 baseline certification requirements.
